

DAVIDE FONTANA

I'm an emerging artist and video editor, graduated with first-class honours in 'New Media Art'. My works have been exhibited in both local and international exhibitions. I have personal and professional experience in video, 3D animation, interactive installations, graphic design, web design, programming, photography and sound art. Following an internship, I worked for over two years in video post-production, demonstrating commitment to meeting deadlines and problem-solving skills even under pressure.
